Dulles, Cuba

In "Meet the Press" TV interview the ex-chief of CIA, Allen Dulles, on the questions about the fateful invasion of Cuba was giving unsatisfactory answers, leading from both sides of his mouth.

Finally, he decided that enough is enough and when asked whether the

appearance of the jet fighters was not expected by CIA on other words whether CIA had known about the existence of jet fighters in Cuba, in answer he used the Fifth Amendment technique. He said, quote:

"We are getting into areas into which I have not only not done any talking, and I don't think I will start now."
